

Our success comes from our employees!

YCE was founded in 2009 as a spin-off of the technical department of a major shipyard. Being a specialist in the composite industry our main focus has always been the rotor of the wind tower generators; in the meanwhile, our activity has grown to include several specialist fields in the maintenance of the generators. To help us achieve our goal of advancing the growth of YCE, we are looking for motivated people who will focus on the success of our Customers.

SERVICE SUPERVISOR

Mission

Supervise all activities relating to O&M, involving the assigned Service Center, managing troubleshooting crews and providing technical supervisory support to technicians in delivering quality work for the operation, maintenance, and warranty repair of wind turbine generators in a safe manner.

We strive to maintain the highest standards of personal safety, thus a high level of Quality & HSE awareness is paramount.

Main Functions

Coordinate and manage the workload within the Maintenance technician team, assuring the performance of all mechanical, electrical and hydraulic maintenance, repair, and replacement of parts and components of wind turbine generators is completed in an efficient, quality and safe manner.

Troubleshoot and provide supervision for troubleshooting crews for complicated mechanical, electrical and hydraulic components of wind turbine generators.

Verify the fulfillment of the contract between YCE and the subcontracted companies assigned to the Wind Farm corresponding to its zone. Schedule of all works on the Wind Farm for execution by the Subcontractor.

Manage contractual obligations and activities, working closely with project owners and various customers on a daily basis for activities including but not limited to preventative maintenance, troubleshooting and repairs of wind turbine generators.

Perform a variety of administrative duties including but not limited work orders, quality documentation, time cards, preventative maintenance checklists, site audits, HSE documentation and other duties as assigned.

Assist with, coaching, training, mentoring and corrective actions concerning employees and contractors. Provide technical support and undertake both classroom and on-the-job training to achieve the objectives. Regularly work with the subcontractor and take a hands-on role in the site. Pursuit of stocks in warehouse assigned to its zone. Inventory control. Analysis of the Work Orders and identification of failures.

Support Service Center manager on all areas of operations. Control the quality and schedule of the execution in the works of Internal and subcontracted personnel. Supervise tools, parts and consumables inventories and ensure accurate and timely calibration of all tooling.

Assist with Profit & Loss (P&L) reporting responsibilities and turbine availability reporting.

Promote a culture of continuous Quality, Health & Safety, and Environmental improvement and to share best practices across the fleet.

Perform all other duties as assigned.
